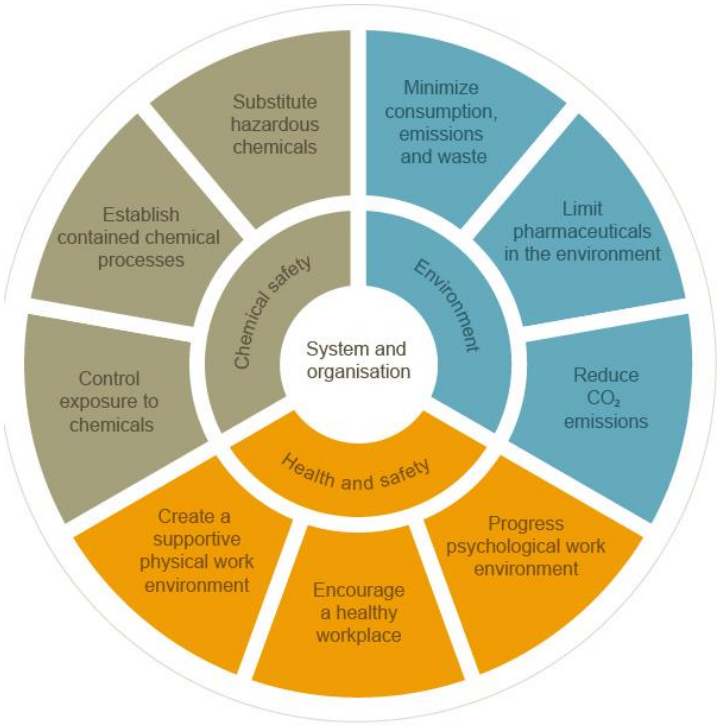
Health, Safety, and Environment Strategy

Lundbeck has a Health Safety and Environment (HSE) strategy to ensure a prioritized, coordinated and long-term HSE effort.


Our HSE strategy ensures that Lundbeck is acting responsible and ambitious in relation to HSE and is an integral part of our Code of Conduct and broader sustainability framework. The HSE strategy is transformed into action through our ISO 14001 and ISO 45001 certified HSE management system which enables our managers and employees to think and act 'green and safe'.
